

Name:

Audrey Zarr

How long have you lived in or owned property in the District?

15 years and four cats

What do you consider important needs of the District?

Firefighters having the resources and training they need to respond quickly to the outlined needs of the citizens of Louisville, or other districts they assist. Prepare Louisville for increasing dry weather and extreme weather conditions that may cause more “once in a hundred year” fires in the future.

What attributes do you have that will make you a good Board Member?

As a long time resident of Louisville, I hope to bring a community perspective to the board. I believe the needs of the Firefighters and Community are equally important and complimentary. I hope to bring my years of analytical thinking as a software engineer to assist the board and Louisville. (Just please don't ask me to write FORTRAN)

What would you like to accomplish as a Board Member?

During the Marshall Fire, I along with so many of the members of the Louisville and Superior Communities watched as homes burned. Our vaillant department and those of other departments, did everything they could to save lives and homes. I want to contribute to Louisville, to make sure that we do all we can to prevent another Marshall Fire, and if it does happen ensure firefighters and families have everything they need to keep safe.

Contact information where you may be reached for more information (e.g. website, email, phone, social media handle, etc).
